Chapter 1. Cord Organizer

Have you ever been looking for your spare phone charger but not been able to find it? In today's world we all have multiple devices that have different chargers and cords and we have a simple DIY project that will help you manage and organize your various cords. In the below section we will guide you through the process of creating a cord organizer from everyday objects you have in your house. This cord organizer will help you stay organized and will provide easy storage for all of your electronic cords.

Chapter 2. Materials

Materials needed for cord organizer

Gather the following materials in order to create your cord organizer:

- 4 toilet paper rolls or paper towel rolls cut to be the size of toilet paper rolls
- 1 rectangular box able to fit 4 rolls
 - For example: shoe box or spare Amazon delivery box
- Tape
- Scissors or box cutter
- Pencil
- Optional
 - Decoration Materials
 - For example: construction paper, felt, stickers, etc...

Chapter 3. Preperation Instructions

Steps to prepare your organizer to be assembled

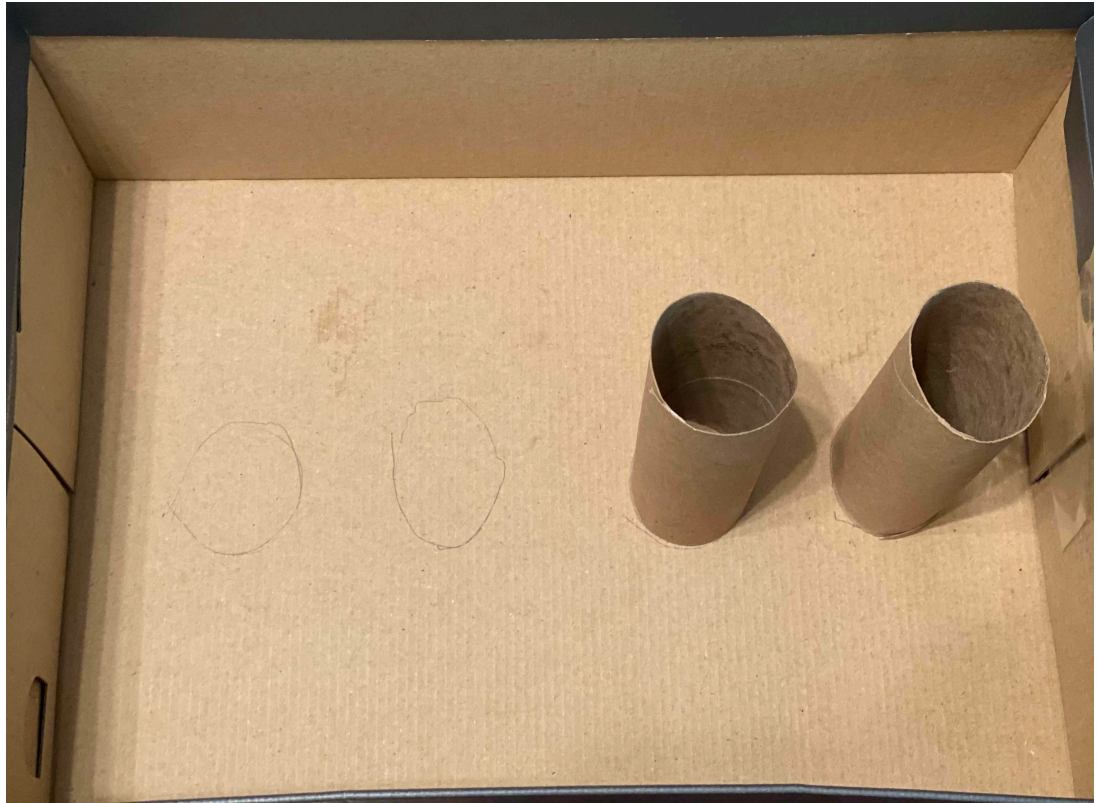

Follow the below steps to prepare your materials for assembly:

1. Within your box layout your tubes in your desired pattern (we recommend inline)

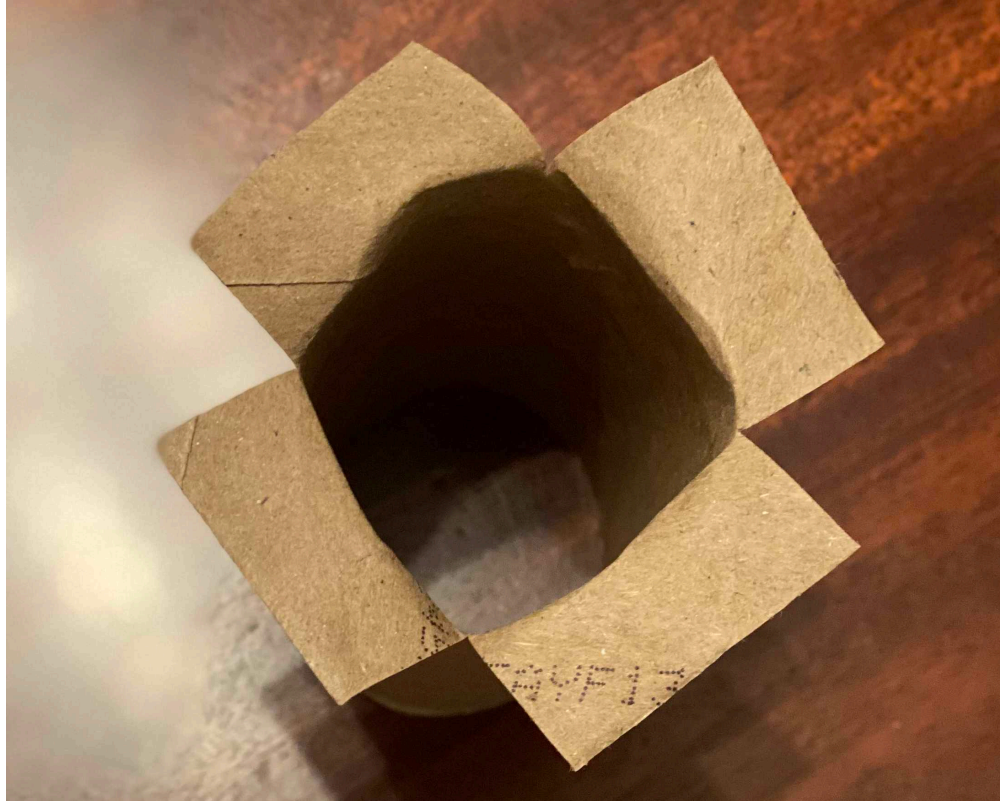

a.

2. Trace the outside of each tubes once you've designed your layout with your pencil

a.

3. On one end each tube, cut 4 individual $\frac{1}{2}$ in. slits, creating 4 tabs
4. Fold each tab outward from the tube so the base of the tube will sit flat on the bottom of the box

a.

b. Optional: If you will be decorating your tube or box, this is the step where you would complete the decoration

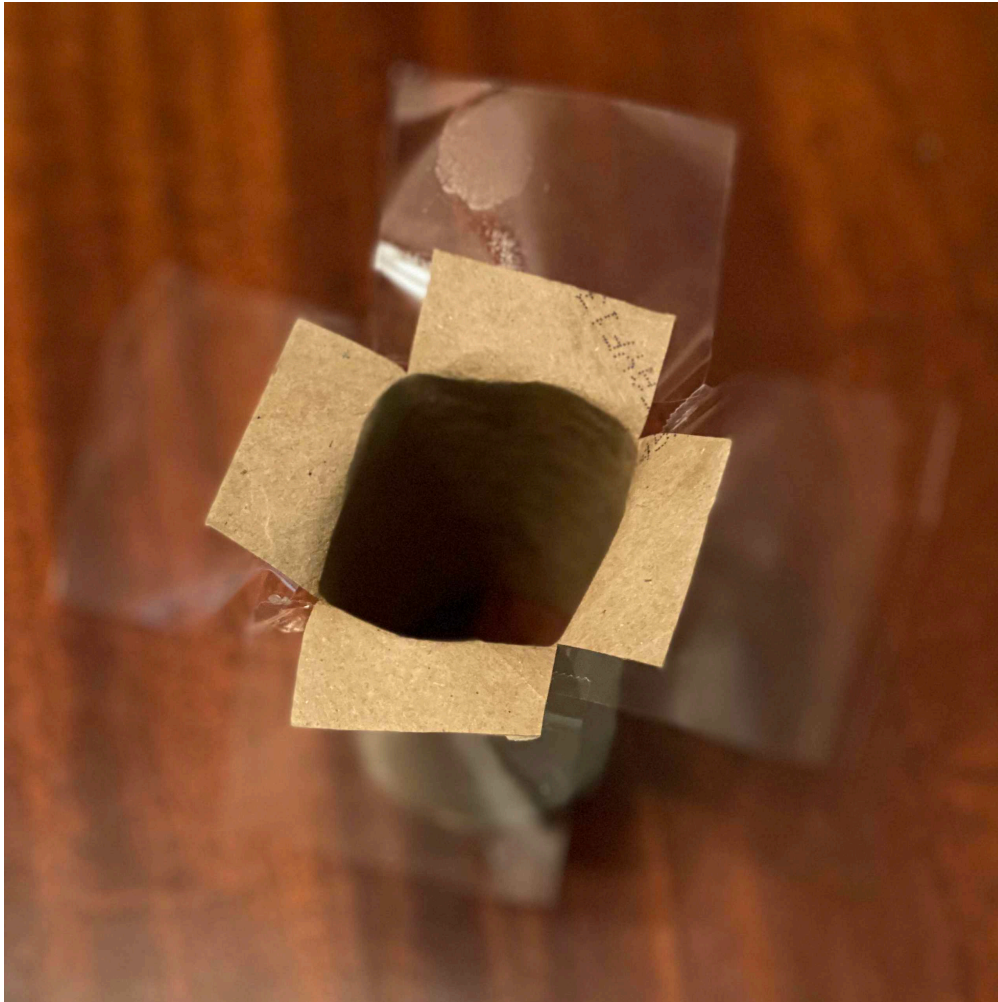

5. Next cut 4 pieces of tape for each tube

Chapter 4. Assembly Instructions

Assembly instructions of the cord organizer

Follow the below steps to assemble your cord organizer:

1. Place the tape onto each tab of the tube

a.

2. Align your tube over the penciled outline and secure the tube to the bottom of the box by pressing the tape on each tab onto the bottom of the box

a.

3. Repeat for all 4 rolls

a.

4. The cord organizer is complete and you can now insert cords into each tube

a.
